description TEXT
path VARCHAR(512)*
default_version INTEGER*
deprecated BOOLEAN*
policy_type VARCHAR(32)
last_used DATETIME*
created_at DATETIME*
updated_at DATETIME*
IAM managed policies (ARN in customer). AWS policies are identified by account_id = '000000000000'. managed_policy_id omits the leading AMPA.
iam.user_attached_policies
user_id VARCHAR(32)* PK 1
managed_policy_id VARCHAR(32)* PK 2
created_at DATETIME*
Managed policies attached to IAM users.
iam.group_attached_policies
group_id VARCHAR(32)* PK 1
managed_policy_id VARCHAR(32)* PK 2
created_at DATETIME*
Managed policies attached to IAM groups.
iam.role_attached_policies
role_id VARCHAR(32)* PK 1
managed_policy_id VARCHAR(32)* PK 2
created_at DATETIME*
Managed policies attached to IAM roles.
iam.deleted_role_attached_policies
role_id VARCHAR(32)*
managed_policy_id VARCHAR(32)*
created_at DATETIME*
deleted_at DATETIME*
Historical IAM role policy attachments.

role_id VARCHAR(32)* PK 1
policy_name_lower VARCHAR(128)* PK 2
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
updated_at DATETIME*
Inline policies attached to IAM groups.
iam.deleted_role_inline_policies
role_id VARCHAR(32)*
policy_name_lower VARCHAR(128)*
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
updated_at DATETIME*
deleted_at DATETIME*
Historical IAM role inline policies.
iam.user_inline_policies
user_id VARCHAR(32)* PK 1
policy_name_lower VARCHAR(128)* PK 2
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
Inline policies attached to IAM users.
iam.group_inline_policies
group_id VARCHAR(32)* PK 1
policy_name_lower VARCHAR(128)* PK 2
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
updated_at DATETIME*
Inline policies attached to IAM groups.
iam.managed_policy_tags
managed_policy_id VARCHAR(32)* PK 1
key_lower VARCHAR(128)* PK 2
key_cased VARCHAR(128)*
value VARCHAR(256)*
created_at DATETIME*
updated_at DATETIME*
Managed policies attached to IAM policies.
iam.deleted_managed_policy_versions
managed_policy_id VARCHAR(32)* PK 1
managed_policy_version BIGINT UNSIGNED PK 2
policy_document TEXT
created_at DATETIME*
deleted_at DATETIME
Historical versions of IAM managed policies.
iam.managed_policy_versions
managed_policy_id VARCHAR(32)* PK 1
managed_policy_version BIGINT UNSIGNED PK 2
policy_document TEXT
created_at DATETIME*
Version of an IAM managed policy.
iam.user_login_profiles
user_id VARCHAR(32)* PK
password_hash_algorithm_id VARCHAR(32)*
password_hash VARCHAR(256)*
password_reset_required BOOLEAN*
password_last_changed_at DATETIME*
created_at DATETIME*
last_used_at DATETIME*
IAM user passwords (hashed) for logging in to the console.
iam.group_memberships
group_id VARCHAR(32)* PK 1
user_id VARCHAR(32)* PK 2
created_at DATETIME*
User memberships in IAM groups.
iam.session_token_encryption_keys
session_token_encryption_key_id VARCHAR(32)* PK
encryption_algorithm VARCHAR(32)*
encryption_key VARBINARY(64)*
issue_valid_from DATETIME*
issue_valid_until DATETIME*
accept_expires_at DATETIME*
created_at DATETIME*
updated_at DATETIME*
Symmetric encryption keys for decrypting session tokens.
iam.deleted_role_token_keys
role_token_key_id VARCHAR(32)*
encryption_algorithm VARCHAR(32)*
encryption_key VARBINARY(64)*
valid_at DATETIME*
created_at DATETIME*
updated_at DATETIME*
deleted_at DATETIME*
Historical session token encryption keys.
iam.deleted_managed_policy_versions
managed_policy_id VARCHAR(32)* PK 1
managed_policy_version BIGINT UNSIGNED PK 2
policy_document TEXT
created_at DATETIME*
deleted_at DATETIME
Historical versions of IAM managed policies.
iam.deleted_user_service_specific_credentials
service_specific_credential_id VARCHAR(32)* PK
user_id VARCHAR(32)*
service_name VARCHAR64)*
service_password VARCHAR(256)*
active BOOLEAN*
created_at DATETIME*
deleted_at DATETIME*
Historical service-specific passwords.
iam.user_service_specific_credentials
service_specific_credential_id VARCHAR(32)* PK
user_id VARCHAR(32)*
service_name VARCHAR64)*
service_user_name VARCHAR(64)
service_password VARCHAR(256)*
expires_at DATETIME*
enabled BOOLEAN*
created_at DATETIME*
Service-specific passwords for CodeCommit, Cassandra, etc. service_specific_credential_id omits the leading ACCA.
iam.deleted_group_inline_policies
group_id VARCHAR(32)*
policy_name_lower VARCHAR(128)*
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
updated_at DATETIME*
deleted_at DATETIME*
Historical IAM group inline policies.
iam.deleted_user_ssh_public_keys
public_key_id VARCHAR(32)* PK
user_id VARCHAR(32)*
fingerprint CHAR(47)*
ssh_public_key_body TEXT*
active BOOLEAN*
created_at DATETIME*
deleted_at DATETIME*
Historical SSH public keys (for CodeCommit).
iam.user_ssh_public_keys
ssh_public_key_id VARCHAR(32)* PK
user_id VARCHAR(32)*
fingerprint VARCHAR(64)*
ssh_public_key_body VARCHAR(256)*
enabled BOOLEAN*
created_at DATETIME*
SSH public keys (for CodeCommit). public_key_id omits the leading APKA.
iam.user_password_history
user_id VARCHAR(32)* PK 1
password_hash_algorithm VARCHAR(32)*
password_hash VARCHAR(256)*
password_changed_at DATETIME* PK 2
Previously used hashed passwords (to check for password reuse).
iam.password_hash_algorithms
password_hash_algorithm_id VARCHAR(32)*
algorithm_name VARCHAR(32)*
parameters JSON8
Password hash algorithms.
iam.deleted_user_password_history
user_id VARCHAR(32)*
password_hash_algorithm VARCHAR(32)*
password_hash VARCHAR(256)*
password_changed_at DATETIME*
deleted_at
Historical hashed password history.
iam.deleted_group_members
group_id VARCHAR(32)*
user_id VARCHAR(32)*
created_at DATETIME*
deleted_at DATETIME*
Historiam IAM group memberships.
iam.deleted_user_credentials
access_key_id VARCHAR(32)* PK
user_id VARCHAR(32)*
secret_key VARCHAR(256)*
enabled BOOLEAN*
created_at DATETIME*
deleted_at DATETIME*
Historical static access/secret keys for API access.
iam.user_credentials
access_key_id VARCHAR(32)* PK
user_id VARCHAR(32)* FK
secret_key VARCHAR(256)*
enabled BOOLEAN*
created_at DATETIME*
Static access/secret keys for API access. access_key_id omits the leading AKIA.
iam.tags
user_id VARCHAR(32)* PK 1
key_lower VARCHAR(128)* PK 2
key_cased VARCHAR(128)*
value TEXT*
created_at DATETIME*
updated_at DATETIME*
deleted_at DATETIME*
Managed policies attached to IAM users.
iam.deleted_tags
user_id VARCHAR(32)*
key_lower VARCHAR(128)*
key_cased VARCHAR(128)*
value TEXT*
created_at DATETIME*
updated_at DATETIME*
deleted_at DATETIME*
Historical IAM user inline policies.
iam.deleted_user_inline_policies
user_id VARCHAR(32)*
policy_name_lower VARCHAR(128)*
policy_name_cased VARCHAR(128)*
policy_document TEXT*
created_at DATETIME*
deleted_at DATETIME*
Historical IAM user inline policies.
iam.deleted_user_login_profiles
user_id VARCHAR(32)*
password_hash_algorithm VARCHAR(32)*
password_hash VARCHAR(256)*
password_reset_required BOOLEAN*
password_last_changed_at DATETIME*
created_at DATETIME*
last_used_at DATETIME*
deleted_at DATETIME*
Historical IAM user login profiles.
Fact (Regular) Table
Domain (Enum) Table
Audit (Logging) Table
Comment
Identifying, one-to-many
Non-identifying, one-to-many
Non-identifying, one to zero or one
Identifying means the foreign key forms part of the primary key in the dependent table.
Non-identifying means the foreign key is a regular column in the dependent table.
